

Let's Save the Planet Together

Do what's right, today!

EarthRehab

EarthRehab was created to support nature on the front line and to develop an understanding of recycled plastic materials. We believe humans enjoy natural settings (like beaches, seas, forests, mountains, and rivers), and harmonizing with the wild. Public display of concern for our environment is critical during this monumental crisis.

We encourage you to purchase and display our product with pride, nobly supporting a green movement. For the record, we have a 100% reception from the foundations, and they would appreciate your support of EarthRehab.

EarthRehab will soon develop a Coral Reef Initiative Fund. It is believed that oceans and its temperament are directly affected by the presence of healthy reef systems. Understanding our reef systems is a step towards rehabilitating our planet.

Proceeds from the sale of [MyGreenLicensePlate](#) will benefit "front-line" Environmental Foundations including **Gumbo Limbo Nature Center, Inc.**

This highly visible and recognized green license plate will display your concern for our planet, and encourage others to join the mission to save the planet.

Why a Green License Plate?

As the public views the License Plate often, it will generate a BUZZ to express individual concerns. The Plate is created from Recycled Milk Jugs.

www.earthrehab.com

Why no logo on the Plate?

It is believed that a Logo would signify one charity or one cause. Consumers can feel proud of their choice of Foundation without specifying a single organization.

You can get your green license plate and start to save the Planet today!
